

**■ Features**

- Wide input range 100~305V AC( Class I)
- Full power output at 70~100% Constant power mode operation
- Metal case with IP67, suitable for outdoor application
- Surge protection with 6K V/4K V (10K V/6K V optional)
- 3 in 1 dimming function (Dim to off and Isolation design)
- India EESL version(optional), can survive input voltage stress of 440Vac for 48 hours
- Protection functions: OVP/SCP/OCP/OTP
- Life time >50,000 hrs. and 5 years warranty

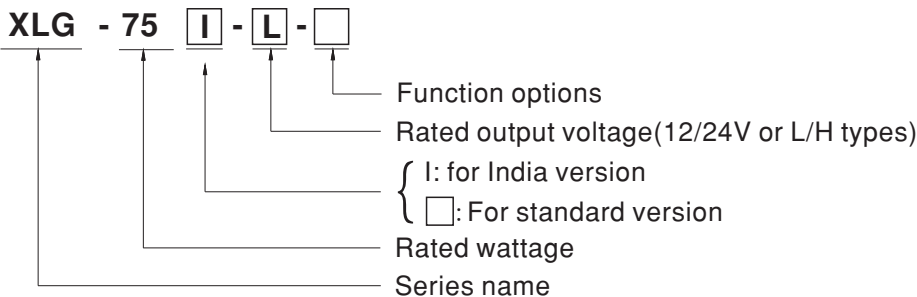

**■ Applications**

- Skyscraper lighting
- Street lighting
- Floodlight Lighting
- Stage lighting
- Fishing lighting
- Horticulture lighting
- Type HL for use in class I, Division 2

**■ Description**

XLG-75 series is a 75W LED AC/DC driver featuring the constant power mode and high voltage output. XLG-75 operates from 100~305VAC and offers models with different rated current ranging between 700mA and 5000mA. Thanks to the high efficiency up to 91%, with the fanless design, the entire series is able to operate for -40°C~+90°C case temperature under free air convection. The design of metal housing and IP67 ingress protection level allows this series to fit both indoor and outdoor applications. Moreover the innovative environment-adaptive capability allows this series to reliably light on the LEDs for all kinds of application environments in almost any spots that may install LED luminaires in the world. XLG-75 is designed with the latest version of IEC61347/GB7000.1-2015 and UL8750 international safety regulations. The output and dimming lines are also completely in accordance with the new regulations with isolation to ensure the users and luminaire system safety during installation.

**■ Model Encoding**

Type	Function	Note
Blank	Io and Vo fixed.(For harsh environment)	By Request
A	Io adjustable via built-in potentiometer	In Stock
AB	Io adjustable via built-in potentiometer + 3 in 1 dimming function (0~10Vdc, 10V PWM signal and resistance)	In Stock

Note: 12V and 24V models only have the Blank and A type

**SPECIFICATION**

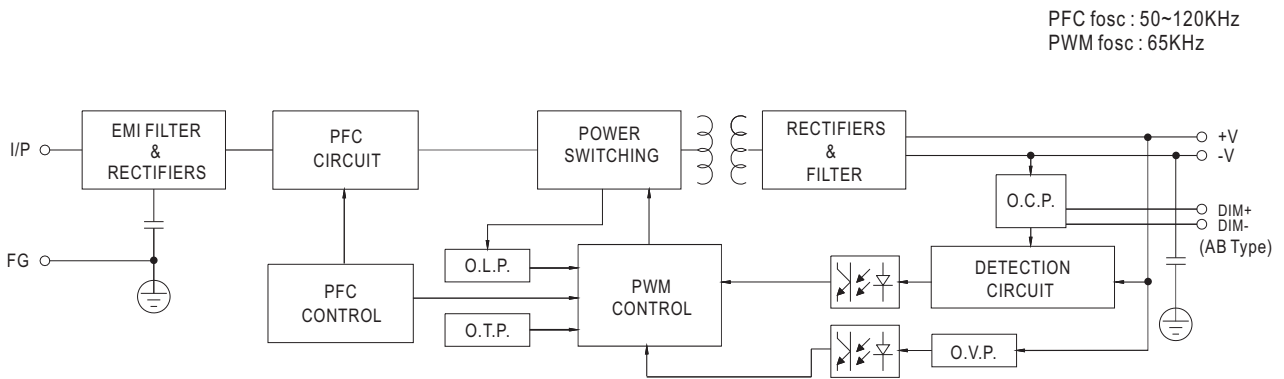

MODEL		XLG-75-12-□	XLG-75-24-□
OUTPUT	DC VOLTAGE	12V	24V

**BLOCK DIAGRAM**

**DRIVING METHODS OF LED MODULE**

※ I-V Operating Area

◎ **XLG-75-L**

Recommend Performance Region    Allow Operation Region

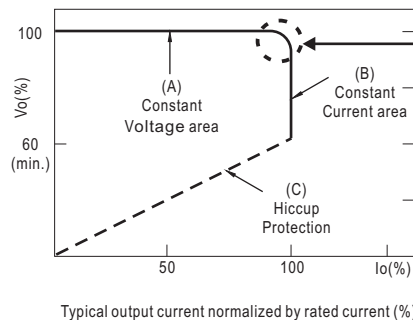

◎ **XLG-75-H**

Recommend Performance Region    Allow Operation Region

◎ **XLG-75-12,24**

※ This series is able to work in either Constant Current mode (a direct drive way) or Constant Voltage mode (usually through additional DC/DC driver) to drive the LEDs.

In the constant current region, the highest voltage at the output of the driver depends on the configuration of the end systems. Should there be any compatibility issues, please contact MEAN WELL.

**■ DIMMING OPERATION**

※ **3 in 1 dimming function (for AB-Type)**

- Output constant current level can be adjusted by applying one of the three methodologies between DIM+ and DIM-: 0 ~ 10VDC, or 10V PWM signal or resistance.
- Direct connecting to LEDs is suggested. It is not suitable to be used with additional drivers.
- Dimming source current from power supply: 100  $\mu$  A (typ.)

◎ Applying additive 0 ~ 10VDC

◎ Applying additive 10V PWM signal (frequency range 100Hz ~ 3KHz):

◎ Applying additive resistance:

Note : 1. Min. dimming level is about 8% and the output current is not defined when 0% < I<sub>out</sub> < 8%.  
 2. The output current could drop down to 0% when dimming input is about 0Ω or 0Vdc, or 10V PWM signal with 0% duty cycle.

**OUTPUT LOAD vs TEMPERATURE**

If XLG-75 operates in Constant Power mode with the rated current the maximum workable  $T_a$  is 60°C (Typ. 230VAC)

**STATIC CHARACTERISTIC**

**POWER FACTOR (PF) CHARACTERISTIC**

※  $T_{case}$  at 75°C

**Constant Current Mode**

**TOTAL HARMONIC DISTORTION (THD)**

※ XLG-75-L Model,  $T_{case}$  at 75°C

**EFFICIENCY vs LOAD**

XLG-75 series possess superior working efficiency that up to 92% can be reached in field applications.

※ XLG-75-L Model,  $T_{case}$  at 75°C
